Building Code/Technical Statement:

Infernoguard 60 products have undergone successful testing by IANZ Testing Laboratory in accordance with AS1530.4 - 2005/2014, as referenced in NZS 4520:2010 and in Building Code Acceptable Solutions C/AS2 Appendix C5.1.1a & C6.1.1.

Infernoguard door sets when installed in line with Soteria Doors installation instructions into a compliant fire-resistant wall, and when fitted with Soteria Doors approved hardware will comply with NZS 4520:2010.

This door is not tested for water ingress in exterior installations and we make no statement as to its suitability under NZBC E2 "External moisture". All exterior doors should be given as much shelter as possible and be fitted with appropriate flashing systems.

The Infernoguard range will, if employed in accordance with Soteria Doors installation and maintenance requirements, assist with meeting the following provisions of the building code:

- NZBC C/AS2
- AS 1530.4
- NZS 4223.3:2016
- NZS 4232.2
- NZS 4520

Environmental - Doors include:

- E0 MDF which is FSC certified
- FSC certified timber rails
- Non-Toxic PVA Bonding Agent
